

PMP Course Content

Course Description:

Project Management Professional (PMP) is a globally recognized and accepted certification credential offered by the Project Management Institute (PMI), USA. PMP certification exam is based on the PMI Project Management Body of Knowledge (PMBOK). Certified PMP adds huge value in future career paths with higher pay. PMP certified project managers are on-demand in Government, commercial, and other business enterprises to bring high success rates of project completion.

PMP framework encapsulates a project life cycle and five major project management suits such as initiating, planning, executing, monitoring & controlling, and closing the project. These PMP processes are applicable in many real-time industrial applications like project integration, scope management, schedule management, cost management, quality management, resource management, communications management, risk management, procurement management, and stakeholder management.

Hachion PMP certification online training curated by top-rated professional experts. Our PMP tutorial well prepared with all basic and advanced course contents up to date.
